

Rutherford Village - Resident Safety Instruction Sheet

Fire Alarm Systems

Building

In Suite Bedroom - LED Strobe Light & Mini Horn

Immediately leave the building using the nearest emergency exit if light flashes or horn sounds.

Hallway - LED Strobe & Mini Horn

Immediately leave the building using the nearest emergency exit if light flashes or horn sounds.

Suite

Smoke Alarm - Ceiling Outside Bedroom or Hall Entrance

Check your suite for smoke, flames or heat if in-suite smoke alarm horn sounds. **Immediately call** 911 if there is smoke or flames that cannot be contained.

Test Requirement: Once per month

Press test button for few seconds until it beeps. **Inform** Site Manager if it does not beep.

Water Systems

Radiator Heating System - On Outside Wall in Suite

If water leaks at radiator pipe, **remove front cover plate**, as shown.

There are 2 shut-off valves: one at each end of your suite. You will likely need to **remove an end cover plate** to locate the valves, as shown.

Close both manual shut-off valves **by turning** 90 degrees.

Domestic Consumed Water System – Shut-off Valves in Suite Front Closet.

If toilet, sink, dishwasher or clothes washer leaks, **remove plastic cover plate** in front closet using flat object (ex. flat head screwdriver) at tabs.

Manual Shut-Off Valves

Close manual shut-off valves **by turning** 90 degrees. **MUST Hold pipe** as you turn valve off.
